**Puts Calcium in Balance™**

**HELPS MAINTAIN NORMAL  
BONES AND TEETH.**

**K2VITAL® SOFT GUMS™**

An innovative vitamin K2 delivery dosage form brought to market by **iNNutriGEL** and **Kappa Bioscience**.

- Vitamin K2 MK-7 is critical for bone health and is especially important in childhood.
- Children and the 40% of adults who have trouble swallowing tablets and capsules need a palatable K2 dosage format.
- Gums are a perfect dosage option, but standard gum manufacturing can affect vitamin stability and label claim.
- The K2VITAL® Soft Gums™ solves this with Soft Gums™ technology, manufactured with low temperature mogul technology (LTM) and SuperStarch® combined with K2VITAL® DELTA protected, microencapsulated vitamin K2 MK-7.
- These innovations create a stable K2 dosage form in a highly marketable format.
- K2VITAL® Soft Gums™ are suitable for kids, vegetarians and vegans. There is no swallowing, they have excellent bite and texture, and they are delicious!

## CONCEPT PARTNER

**INNUTRI**

Swiss based iNNutriGEL AG developed and designed the low temperature mogul technology (LTM) to produce Soft Gums™ based on SuperStarch®. Soft Gums™ are an alternative dosage form for people who want to take their nutraceuticals but have difficulties to swallow e.g. capsules.
